I'm using for loops to loop through each element, but the result is not what I expect. Here is my code: `import numpy as np A = np.array([2,3,4,5,6,7,8,9,10,11]) for x in A: print '%d'%(x)` This will print: 2 3 4 5 6 7 8 9 10 11 But what I want it to print is: 2 3 4 5 6 7 8 9 10 11 Here is the result I get after I use the for loop: 4 5 6 7 8 9 10 11 How can I get the expected result? Thanks! A: try this `A = np.array([2,3,4,5,6,7,8,9,10,11]) print("".join(A))`

Acid Reflux Diet Drinks A healthy diet is a common practice. It involves a restriction of food intake and followed by the general principle of eating fruits and vegetables. All these dietary habits lead to a varied content of nutrients and beneficial compounds present in the food. Alcoholic beverages are well known for their harmful effect on human health and therefore, doctors recommend that people should try to minimize their consumption. Besides their probable negative effects on human health, alcohol is also a commercial hazard which leads to excessive loss of money. This is due to the fact that, at the end of the day, when a storekeeper sells the goods it is usually at a discounted rate. This additional cost incurred by the storekeeper can be recovered by increasing the price of the alcoholic beverages. Therefore, alcohol consumption can lead to loss of income. Removing alcohol from the diet may seem difficult and most people do not have the adequate knowledge to do so successfully. However, when it comes to removing the alcohol from our diet,

Excerpt from Health & Safety / Intended Use Siwerta® Superdense Water Purification System is a commercial and Industrial Water Treatment System. The system uses a Superdense Water Purification Membrane and uses a standalone system design. The main application of the system is the addition of any substance such as a food additive, a food color or any substance that needs to be safely and effectively introduced into purified water. Proposed Usage (Need confirmation): Benefits: It is essential to ensure the purity of drinking water if the water is used for health reasons, nutrition, and consumption. Water can be contaminated by various waterborne diseases. There are various pollutants present in water that can cause health disorders if ingested. The Siwerta® Superdense Water Purification Membrane provides a safe and effective method of water purification for water consumption. Its design allows addition of any substance to water with minimum loss of quality. Directions for Use: Place the membrane as per directions and follow the manufacturer's instructions. Purified water comes in various volumes and can be stored in a refrigerator for later use. Siwerta® Superdense Water Purification Membrane is safe for all water, including human and animal consumption. Storage & Handling: Store membrane at 15-20°C. The membrane is sensitive to temperature fluctuations and may stick to the surface of the membrane. Siwerta® Superdense Water e79caf774b

The university plans to hold a formal ceremony on Sept. 12 to formally dedicate a new \$40 million athletic center in honor of the men. The center, dubbed the Cornerstone, will be made up of two adjacent buildings -- one on the university's north campus and the other in Fairchild Forest. Much of the funding for the buildings is coming from donations and initiatives meant to raise awareness of the Sandusky scandal. The "Sandusky Wall of Fame" -- a full-length, 24-foot mural depicting the former assistant football coach -- stands in a room adjacent to the new center. University President Rodney Erickson, who has lobbied for a more prominent memorial to Sandusky, said he plans to create an office for the football coach once the new athletic center is built. "I'm very, very happy about it," Erickson said. "I'm very excited about the meeting with the new athletic director, the head football coach and the student-athlete staff.... We're going to celebrate and talk about the Sandusky debacle. We're going to celebrate the successful
