In order to open RAR files that have been downloaded and saved in your computer, you'll need to open the .rar file using a Windows-based application. According to the type of software you're using, Windows-based software can be .exe, or .msi. An .exe file will have a .exe extension, whereas an .msi file will have a .msi extension. If you're currently using software that supports .rar files, just double-click the downloaded .rar file to begin the install process. If you're using a different file-type software, you may need to download and install a specific .rar software in order to open the download. Below are a few simple instructions to help you open and extract .rar files. Extract files from .rar files: If you want to extract the .rar files you've downloaded from the internet, you'll need a .rar software application that's specifically designed to work with .rar archives. When searching for .rar software on the internet, you'll want to make sure the software is compatible with Windows 7. Use WinZip or WinRAR to open .rar files: If you're running Windows Vista or Windows XP, you can download WinZip or WinRAR to allow you to easily open .rar files. By double-clicking the downloaded .rar file, you will prompt you to install WinZip or WinRAR software. If you're using a file-type software application that doesn't support .rar files, you may need to download and install a specific .rar application. .rar files can be downloaded as a ZIP file or a .rar file. If you're downloading a .rar file, please make sure that you know that you're downloading a .rar file. If you're having issues downloading and opening a .rar file, try adding the file directly from your browser. You can download the .rar file directly by navigating to the internet, on your computer, and clicking on the download button. You can click on the link of the .rar file right from your browser, or you can also copy the link of the .rar file and paste it in the browser address bar. If you're having issues with your browser downloading or opening the.
